

Brandon Jacobs

Hello, my name is Brandon. I was born in Reno then moved to Indiana shortly after that for about 10 years then moved back here in the 5th grade. I chose the University of Nevada Reno for a few reasons, one of them being tuition and it being so cheap. I also ski a ton in the winter and need someplace with good skiing and good winters and I knew a lot of people already from Reno. As I already said skiing is definitely one of my favorite hobbies, others consist of golfing (4 handicap), mountain biking, hiking, or basically anything in the mountains. Music I could go on and on about. I don't think I really have a favorite artist but I would say my favorite genre would be hip hop/rap or 2010 throwbacks like Bruno Mars. My favorite movie has to be the "The Maze runner" series with pirates of the caribbean in a close 2 spot. I would say that as far as the dreams and aspirations part would be to get sponsored for skiing or to become a pilot before I graduate. I am currently majoring in business and will most likely declare for marketing. As of right now I am working on becoming a pilot as my main choice of a career. If that falls through after I graduate I would want to try to start up my own business and am using the website assignment for this class and a huge tool for my future. As far as my tech. Background I would say it's not the best. I definitely know the basics to my pc but could learn a lot more. When it comes to software I don't think I use that much besides basic web browsers or emailing and messaging platforms.
